3. 2017 Objectives
Outlook: 2017 objectives confirmed

- High quality 2017 revenue
  - Almost all geographies up
  - All large product categories contributing positively to growth

- Despite the unfavorable foreign exchange trends in second-half 2017, Groupe SEB confirms and refines its objectives:
  - Growth in Operating Result from Activity before PPA one-offs* comprised between 30 % and 35 %
  - WMF accretive by $\geq$ 20% on 2017 EPS, before impacts of PPAs

*PPA one-offs on 2017 ROPA: -€17m, all in H1
Glossary
**On a like-for-like basis (LFL) – Organic**
The amounts and growth rates at constant exchange rates and consolidation scope in a given year compared with the previous year are calculated:

- using the average exchange rates of the previous year for the period in consideration (year, half-year, quarter);
- on the basis of the scope of consolidation of the previous year.

This calculation is made primarily for sales and Operating Result from Activity.

**Operating Result from Activity (ORfA)**
Operating Result from Activity (ORfA) is Groupe SEB’s main performance indicator. It corresponds to sales minus operating costs, i.e. the cost of sales, innovation expenditure (R&D, strategic marketing and design), advertising, operational marketing as well as commercial and administrative costs. ORfA does not include discretionary and non-discretionary profit-sharing nor other non-recurring operating income and expense.

**Adjusted EBITDA**
Adjusted EBITDA is equal to Operating Result from Activity minus discretionary and non-discretionary profit-sharing, to which are added operating depreciation and amortization.

**Net debt – Net indebtedness**
This term refers to all recurring and non-recurring financial debt minus cash and cash equivalents as well as derivative instruments linked to Group financing having a maturity of under one year and easily disposed of. Net debt may also include short-term investments with no risk of a substantial change in value but with maturities of over three months.

**Operating cash flow**
Operating cash flow corresponds to the “net cash from operating activities / net cash used by operating activities” item in the consolidated cash flow table, restated from non-recurring transactions with an impact on the Group’s net debt (for example, cash outflows related to restructuring) and after taking account of recurring investments (CAPEX).
